I am a highly skilled Software Engineering graduate with a solid background in IT support, specializing in hardware and software management. Having gained experience as an IT System Administrator, I have worked closely with companies, delivering technical solutions and ensuring the smooth operation of systems through tailored contracts. I am passionate about leveraging my technical expertise and problem-solving abilities to streamline customer service operations and drive efficiency. With strong leadership, listening, and negotiation skills, I am committed to contributing to a company's success by delivering exceptional results and enhancing operational workflows.

- Provide the necessary support to develop and maintain the entity-level IT disaster recovery plan (DRP), based on the business impact assessment (BIA) Conduct proactive monitoring of IT systems performance and execute required maintenance activities to ensure stable and reliable performance.

Education

June 2024

Addis Ababa institute of Technology

- Bachelor of Science, Software Engineering
- GPA: 3.01

Projects

Ashewyna - Event Organizing App

- Developed a full-stack event management application connecting vendors, customers, and event organizers.
- Designed and built the frontend using Flutter and implemented the backend with Node.js & MongoDB.
- Led API development, integrating secure authentication, payment processing, and real-time updates.
- Collaborated with a team to ensure efficient deployment and user-friendly functionality.

Qignit – Amharic Music App

- Designed and developed Qignit, a Flutter-based Amharic music streaming app.
- Built an intuitive user interface (UI) and implemented smooth audio playback features.
- Integrated cloud-based storage and API connections for music streaming and content management.
- Optimized the app for performance, offline playback, and efficient data usage.

Skills

- Task prioritization, time management, and ability to work under pressure
- Experienced in working with databases and information systems to input and retrieve data efficiently.
- Skilled in using productivity software (e.g., Microsoft 365, Google Sheets, Smart Sheets) for organizing and analyzing data.
- Familiarity with data verification and validation processes to maintain data integrity.
- Excellent verbal and written communication skills, enabling effective interaction with colleagues, clients, and stakeholders.
- Organized with a positive and professional attitude
- Client and customer care
- IT infrastructure management
- Programming Languages: Java, JavaScript (Node.js), Dart
- **Front End Development** : Flutter Design(Dart)
- **Back End Development**: Node.js Mobile Development
- **Tools**: ArcGis, Figma, Photoshop, Postman, VM, Linux, Windows Server, Cisco Meraki, Office 365
- **Database**: MongoDB, MySQL

Certificates

- Advanced Flutter | Dart | Clean architecture | E-commerce course - Udemy
- Backend | Nodejs | State Management - Udemy
- Flutter-test-driven-development-with-clean | Architecture Flutter-course-for-complete-beginners - Udemy
- Cybersecurity - Udemy
- Professional Diploma in Office Administration - Udemy
- Pan Africanism Seminar - The PLO Lumumba Foundation
- 10 Academy(KAIM 3&4)- Artificial Intelligence Mastery
